

DIGITAL CURRICULUM SOLUTION

“It is a challenging problem — meeting the remediation needs of high school students who lack basic skills. You can’t take them back to elementary curriculum because it’s demeaning to them. Keeping the content relevant for high school students, but having a high level of remediation is what is needed, and Apex Learning is responding to that need.”

➤ Individualize Instruction to Provide Targeted Remediation

“68 percent of 8th graders score below proficient in reading, and 66 percent score below proficient in math.”

— National Assessment of Education Progress (NAEP)

Skills deficiencies in literacy and math must be addressed for many secondary students before they are prepared for success in grade-level courses. Apex Learning digital curriculum offers the opportunity to individualize instruction to address the unique remediation needs of each student.

Develop Basic Skills with Age-Appropriate Content

Apex Learning Foundations courses are specifically designed to address the interests and maturity of students ages 13 and older. Moving at an individual pace, each student is able to take as much — or as little — time as they need to acquire skills appropriate to grades 3 to 8. Interactive multimedia instructional content, extensive scaffolding, frequent opportunities for practice, and integrated formative assessment help students succeed where they did not in the past.

Prepare Students for Success in Algebra I

Success in Algebra I is an important predictor of whether a student will drop out or remain in high school and graduate, yet many secondary students are ill prepared for the rigors of Algebra I. Math Foundations courses integrate carefully paced, guided instruction with interactive practice to remediate math skills required for students to succeed in Algebra I and beyond.

Support Literacy Development for Struggling Readers and Writers

Literacy issues pose significant challenges to preparing students for success in high school. Offering solutions for below-basic and below-proficient readers, English Foundations courses are designed for adolescents who need structured remediation in reading and writing. Scaffolded instruction and extensive practice focus on the development of reading comprehension skills and strategies, as well as writing and composition.
